As a new xm listner, I thought I would just enjoy commercial free music while riding down the road, but was surprised to find the in-depth traffic reports provided by XM radio. Normally I would sit in traffic waiting for the next lame traffic report, given at a speed only lawyer could assimilate. I like turning on the radio and getting a clear and concise report on the roads ahead. If commercial radio provided such a benefit I would thank them, but they don't. The public needs to be better served.

Please, I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve.
